

## **Support commissioner measures**

The Jackson County Board of Commissioners needs restructuring for fair, effective representation of all voters. So make it nonpartisan.

Commissioners are responsible for land use planning. Yet Alameda fire survivors, who have lost homes, found razed lots blocked by new buildings, without notification required by code.

I witnessed the county administrator refuse to accept the photographic evidence of severe code violations that multiple hearing officers and judges ruled substantial. Give the people a voice.

Commissioners make decisions on air quality. Medford/Grants Pass is listed as No. 8 in the U.S. for poor air. Private citizens must matter.

Commissioners are responsible for emergency management. The COVID-19 emergency was mishandled. Care and protect us.

Commissioner undermining of the animal shelter increased euthanasia, lowered adoptions, affected poorer care and supported an exploding feral cat population. Meet our needs.

Voting Yes on 15-224, 15-225 and 15-226 is for fixing what's broken.
